OFFICIAL.
United States Government Report.

National Board of Health, Washington, D. C. Bulletin—Supplement No. 6, page 33:

"I have tested several kinds of baking powders which I have bought in the open market. The following table gives the commercial name of the baking powder and the number of cubic centimeters of gas given off:"

"Dr. Price's (the only Baking Powder that does not contain Lime, Ammonia or Alum)....... 116.0"
"Royal......... 101.7"

"E. G. LOVE" (Public Analyst.)

Canadian Government Report.

"To the Commissioner of Inland Revenue Department, Ottawa (seat of government), Canada: Eight samples of baking powder have been analyzed. As the efficiency of these powders depends almost entirely upon the amount of carbonic acid gas given off during their use, the following comparative statement has been prepared, showing in each instance the quantity of carbonic acid gas eliminated from five grammes (equal to 77 grains) of the powder:"

"Dr. Price's (Result of Analyses) 39½ cubic inches." (Does not contain Ammonia, Lime or Alum. Pure.)

"Royal, (Result of Analyses) 33¼ cubic inches." (Contains matter insoluble in water 24.05 per cent, consisting of Starch, Ammonia and Tartrate of Lime. Adulterated.) "W. SAUNDERS,"

Ottawa, Canada, April 2, 1887. "Public Analyst, Inland Revenue Dept."

These investigations were not made for a money consideration, but in the interests of the governments of the United States and Canada. We know that it will delight the millions of housekeepers who use DR. PRICE'S CREAM BAKING POWDER to see it endorsed as the strongest, purest and most healthful, by these highest authorities.

DR. PRICE'S CREAM BAKING POWDER is the only baking powder upon which the UNITED STATES and CANADIAN GOVERNMENTS ever made a favorable report.
